

# **New Research Study at NYU Grossman School of Medicine for Partners of Prostate Cancer Patients**

## **Evaluating the Impact of Prostate Cancer Therapy on the Sexual Quality of Life of Couples**

The purpose of this study is to examine the sexual quality of life of female partners of prostate cancer patients.

This research study is being done to collect your thoughts/reactions/opinions. It will involve a telephone interview that will last approximately 30 to 45 minutes.

During the interview, a member of the research team will ask your perspectives on sexual health and the impact of prostate cancer.

### **You may be eligible for the study if you are:**

- A female partner of a patient with prostate cancer
- A U.S. adult female over age 18
- Have access to a telephone and the web

### **Participation in this research study will include:**

- A 30 to 45 minute interview via telephone
- A verbal discussion of demographic questions
- A discussion on feelings about your sexual health
- Questions regarding your sexual quality of life before and after prostate cancer treatment
- Questions about relationship changes
- Suggestions of resources for others in your situation
