 "Voces of a Pandemic"

▶ Access to the Media Series is linked throughout these pages. Click on the tabs on the right to explore the toolkit.

This toolkit evolved from The Latino Cancer Institute's March 2021 Media Series *Reporting from the Frontlines of a Pandemic*. These pages include a rich array of sources, resources, COVID-19 data, news, and invaluable links. This document is intended to inform the media's reporting and provide assets for Latino communities designing solutions to pandemic impacts, vaccine uptake and recovery.

► ECONOMIC IMPACT

The First Year of Latino COVID-19 Deaths: Why Should Anyone Care?

During its first year, the coronavirus has ravaged Latino families and communities in California and the United States far more than it has to non-Latino populations. This report coauthored by Dr. David Hayes-Bautista takes a look at how much worse it has been.

www.uclahealth.org/ceslac/workfiles/Research/COVID19/CESLAC_Report_11-The-First-Year-of-Latino-COVID-19-Deaths-Why-Should-Anyone-Care.pdf

The 2020 LDC U.S. Latino GDP Report seeks to provide a factual view of the large and rapidly growing economic contribution of Latinos living in the U.S.

https://diversity.ucdavis.edu/sites/g/files/dgvnsk731/files/inline-files/2020_LDCLatinoGDP_final.pdf

“We expect, in fact, that the Latino GDP will drive the post-pandemic recovery.”

David Hayes-Bautista, PhD, Director, Center for the Study of Latino Health and Culture (CESLAC), UCLA

► Hear more from [Dr. David Hayes-Bautista](#), a culture and history expert and first speaker from the Media Series, emphasize the economic harm done to the Latino community by COVID during his presentation on March 9, 2021.

THE LATINO CANCER INSTITUTE
Connect. Convene. Advocate.

The Latino Cancer Institute

The Latino Cancer Institute (TLCI or The Institute) is a national alliance (network) of Latino cancer service agencies committed to developing and disseminating best practice programs among its community partners, collaborating in research and effecting policy change that results in diminished Latino cancer risk and mortality. As a convener and community advocate, TLCI recognizes the scope of its work as an expansion beyond reporting the disease incidence rate. The Institute is dedicated to approaching cancer data /statistics (mortality/incidence rates) through a more holistic lens by discussing and creating action items that aim to address social determinants of health and ongoing disparities that may contribute to higher prevalence in this population.

As a nonprofit organization, we rely on philanthropy, grants, and personal donations to support our mission. This funding allows us to continue the development and delivery of new programs and tools that we share with those making a difference in the lives of Latino cancer patients, survivors, and the community at large.
