Building Networks, Addressing Disparities, and Driving Policy through The Latino Cancer Institute

Ysabel Duron of The Latino Cancer Institute joins President Joe Biden in the East Room of The White House as he talks about the urgency to conquer cancer with the reopening of the Cancer Moonshot program, Feb. 2, 2022.

The Latino Cancer Institute (TLCI or The Institute) is a national network of nonprofit cancer service agencies dedicated to the promotion of education, research, and policy that diminishes the cancer burden in the Latino community. TLCI operates from a framework of 'science meets service' and proposes to act as a connector, convener, and advocate for patients and stakeholders who address health disparities throughout the cancer landscape. The Institute continues to develop and share new programs and tools that make a difference in the lives of Latino cancer patients, survivors, and the community at large.

Your Support + Our Team = Impact

Where do revenues come from?

Grants	\$ 182,750.00
Individuals	\$ 21,675.90
Corporations	\$ 5,000.00
2021 Total Revenues	\$ 209,425.00

What did the revenues pay for in 2021?

- Program 75%
- Management 18%
- Website – Building an online community 6%
- Fundraising 1%

"Thanks to our small donors, TLCI was thrilled to contribute \$15,000 to support two San Francisco Bay Area COVID vaccination clinics, a food bank, and teen COVID education."

Outcomes in 2021

Hereditary Breast Cancer Toolkit Research Project "Tu Historia Cuenta"

500 women were educated virtually and 35 women identified at-risk as part of a collaboration on genetic education with Dr. Laura Fejerman, PhD, UC Davis / UCSF Helen Diller Family Comprehensive Cancer Center. The aim is to inform low-income Spanishspeaking women to identify breast cancer risks through family history, followed by navigation into testing, counseling, and treatment as indicated.

Stanford MEDICINE

CIRM
CALIFORNIA STEM CELL AGENCY

California Institute for Regenerative Medicine

TLCI leadership drove CIRM policy requiring research applicants to provide plans that include racial/ethnic communities in clinical trials research and other stem cell funded projects.

CommuniVax

Engaged in a national rapid response research coalition to work on vaccine promotion and building health equity in six BIPOC communities.

"Thank you, Ysabel, for your help guiding CommuniVax this past year."

Monica Schoch-Spana
Senior Scholar, Johns Hopkins Center for Health Security

Stakeholders in Our Mission to Eliminate the Latino Cancer Burden

Funders address a population in crisis and ease the economic and social burden caused by cancer.

Agencies come out of isolation to share best practices and connect with researchers, funders, and policy makers.

Researchers collaborate with peers, learn of new scientific trends that will inform their work, and connect with communities to translate research into action.

The Latino community gets improved access to education and care, as well as the fruits of medical research.
