

THE LATINO CANCER INSTITUTE
Connect. Convene. Advocate.

8th Annual National The Latino Cancer Institute Friday Forum Virtual Series

September 18 - October 9, 2026

9:00 am - Noon PST • 11:00 am - 2:00 pm CDT • Noon - 3:00 pm EST

Social Determinants of Health – Exploring the Factors Driving Latino Cancer Risk

TLCI is seeking researchers, clinicians, community, and industry partners interested in presenting, promoting or sponsoring the 2026 Forum Series.

Presenters will:

- Identify SDOH-related drivers affecting Latino communities (e.g., poverty, food insecurity and obesity, housing instability, limited access to preventive care, occupational and environmental exposures, language barriers, and chronic stress).
- Spotlight the science and the known risks.
- Include community-based organizations driving local solutions.
- Include what's working and what's missing – where policy, community partnerships, health systems, and data infrastructure can be strengthened to measurably reduce inequities.

Who should attend:

- Community leaders
- Clinicians
- Researchers
- Public health professionals
- Healthcare experts
- Policymakers
- Patient advocates
- Patients
- Students
- Industry

Registration details coming in May.

Social determinants of health (SDOH) are the conditions in which people are born, grow, learn, work, play, live, and age, and the wider set of structural factors shaping the conditions of daily life.

This year's virtual Forums will focus on Social Determinants of Health (SDOH)—**factors driving Latino cancer risk**, screening, diagnosis, and survivorship in Latino communities.

Calendar these four consecutive Fridays (Sept 18, 25, Oct 2, 9) for—a learning and action series connecting evidence, lived experience, and systems change—presentations by scientific experts, community groups on advancing local interventions, and tackling systemic barriers.

**Free Virtual
Forum Series**
Spanish
interpretation
is provided.
